---

The CSI 182 Plus TOPCon modules utilize N-type silicon wafers with extended minority carrier lifetimes, coupled with the implementation of advanced tunnel oxide passivating contacts ...

The series integrates 182mm large-size silicon wafers increases the wafer size, optimizes the layout profoundly and decreases the invalid power generation area.

The reason for the rapid popularity of rectangular silicon wafers in the short term is simple: firstly, technology has improved, ...

From the confrontation between 182 and 210 in 2020 to the gradual realization of sub-format and small-scale size standardization in the past two years, this round of size ...

silicon wafer size maintained stably at 156.75mm for several years, G1 (158.75- 223mm) and M6 (166-223mm) emerged recently. On the one hand, these slightly larger wafer sizes are ...

Currently, there are two main camps of silicon wafer sizes in the global PV industry, namely the 182 camp represented by Longi Green ...
