---

The Veichi 2.2kW Three Phase Solar Pumping Inverter represents a high-performance solution for utilizing solar energy to power water pumps in three-phase systems.

After years of deep cultivation and exploration in the solar water pump industry, INVT has carefully developed a new solar water pump inverter: ...

This efficient system includes 15 pieces of 320W Mono Solar Panels to harness solar energy and generate DC electricity, along with the GS-R85-QF-16 solar pump that delivers 2.2KW power ...

The high efficiency SP series allows PV input of up to 800V (Voc) and includes built-in MPPT technology to maximize the return from your solar array. Output voltage for single phase ...

After years of deep cultivation and exploration in the solar water pump industry, INVT has carefully developed a new solar water pump inverter: SP100 series. SP100 has comprehensively ...

GoHz 1.5kW-4kW Solar VFD (Variable Frequency Drive) is engineered for efficient, standalone water pumping systems powered by solar energy. Unlike traditional VFDs, this unit ...
