These innovations aim to improve energy efficiency, reduce size, and increase the payload capacity of drones, making them more ...

The 30/42/60kWp Foldable Photovoltaic Container All-In-One integrates high-efficiency PV modules, intelligent energy storage, and modular power management into a single container.

At Airbus, we are working to use this alternative renewable energy source to power high-endurance stratospheric flight. Our advances in solar cell ...

These innovations aim to improve energy efficiency, reduce size, and increase the payload capacity of drones, making them more viable for long-endurance missions.

Researchers from Spain and Ecuador have developed an optimization method to integrate PV cells and batteries into UAVs. They presented their findings in " Optimization of ...

We designed and fabricated a fixed-wing UAV powered entirely by solar energy, managed by novel energy-aware control algorithms. A thorough analysis proves the system can harvest ...
