---

The ICE-44 V2X is a compact yet powerful 44kW "Vehicle-to-Everything" bidirectional DC Fast charger that supports Vehicle-to-Grid (V2G), Vehicle-to-Vehicle, and other discharge use cases.

New York must deploy new energy storage resources at scale to zero out power-sector emissions by 2040, as required by state law, Hoos said.

InCharge Energy's ICE-44 V2X charger delivers swift charging, boasting a 44kW-rated output power and a wide voltage range of 150 to 1000Vdc. This ensures rapid and ...

High Power Output with Less Input Charging power can be modularly increased up to a total of 194kW output (44kW from grid + 150kW from energy storage system) and tailored to the ...

The 2024 Energy Storage Order established a statewide goal of deploying 3,000 MW of new bulk energy storage by 2030 and required that NYSERDA submit a draft ...

EVOLTCITI(TM) is a leading provider of innovative Energy Storage solutions designed for industrial and consumer applications including PACK, PCS, BMS and EMS.
