Germany's Munich Airport has implemented a sustainable energy generation container solution from energy system solution provider FlowGen to charge electric vehicles.

The study investigates the effects on the airport electrical system from renewable energy sources and energy storage systems at the airport, and the potential to deliver ...

In cooperation with Munich Airport, the mobile energy container is being used to charge electric vehicles in a trial project that is expected to last 12 months. The energy ...

Munich Airport has opted for an innovative system for sustainable energy generation using a container with photovoltaic panels and wind rotors. The equipment, from ...

A flexibly deployed energy storage charging solution can quickly respond to peak demand, enhance energy dispatch capabilities, and ensure uninterrupted operations.

Munich Airport, in collaboration with green energy company FlowGen, is testing an innovative mobile energy container equipped with ...
