The world's first wind power plant to produce traction current has been built in Lower Austria. It feeds directly into the catenary, supplying the trains with wind energy directly and with low losses.

The new regulation also defines the framework conditions for the subsidisation of investment grants for hydropower, wind power and biomass plants. Funding calls, the amount ...

Operators can apply for grants for the construction of small photovoltaic systems or wind turbines (up to 1 MW capacity), the conversion of biogas plants to "green" gas or ...

Owing to political efforts and the promotion of renewable energy, there are several other renewables that have gained importance over the past few years including wind, geothermal ...

This paper presents three scenarios (policy, renewables and electrification and efficiency) for transitioning to a 100 % renewable electricity sector in Austria, based ...

At the moment only 1/3 of the tender volumes are awarded. 450 MW of wind power are fully approved and waiting for subsidy conditions that make the installation possible. In 2022 a ...
