Operational since mid-2025, the 17-hectare solar park features 22,204 modules that produce 19.3GW/yr of electricity, meeting around 15% of the plant's total energy demand. ...

The innovative and mobile solar container contains 200 photovoltaic modules with a maximum nominal output of 134 kWp and, thanks to the lightweight and environmentally friendly ...

CEMEX and Synhelion announced today the successful production of the world's first solar clinker, the key component of cement, ...

Advancing from that stage to production under plant-like and continuous conditions reaffirms the tremendous potential of this technology to reach industrial-scale implementation. ...

An innovative and efficient solar power plant solution has been developed for cement factories. On an annual basis, solar PV systems in cement plants may save 22,941 tonnes of CO<sub>2</sub>.

CEMEX and Synhelion announced today the successful production of the world's first solar clinker, the key component of cement, a significant step towards developing fully ...
