---

Magna has achieved a significant breakthrough by developing a stamping process that creates a battery enclosure with near-rectangular corners and sidewalls, eliminating failure modes and ...

Here's how it optimizes lithium-ion battery case stamping: Operators input stamping parameters (step distance, speed) via a touchscreen interface. The PLC instantly calculates pulse signals ...

Deep drawn stamping allows for reduced production time, as well as lower ...

From battery box design, and fabrication, to quality inspection - our team handles every process for you. Our team will help you choose the right material, recommend the best ...

We bring smarter structural battery solutions by leveraging our precision stamping and forming expertise, advanced R& D capabilities, and time-proven proprietary manufacturing technologies.

Due to the high cost and manufacturing difficulty of aluminum battery trays using extrusion, casting and sheet forming, an opportunity exists for a stamped one-piece steel ...
