What material is used in power battery aluminum trays?

Chalco's production of power battery aluminum trays mostly uses 6-series 6061 aluminum plate as the raw material for battery aluminum trays, which can meet the characteristics of high precision, corrosion resistance, high temperature resistance, and impact resistance to protect the battery core.

What alloys are used for EV battery trays?

Our main alloys for EV battery trays are aluminum 6061T6. This material has excellent characteristics for the optimal performance of the EV battery tray. For instance, 6061 extruded aluminum is light, moderately strong, and corrosion-resistant. It is also formable and has good thermal conductivity.

What is a car battery pack housing made of?

The traditional car battery pack housing is cast from steel plate, aluminum alloy and other materials, and then the surface is sprayed.

Which aluminum alloy is used in power batteries?

Aluminum alloy is a commonly used material for power batteries, and there is an urgent need to focus on research, development, and upgrading of products and alloy materials. At present, the conventional aluminum alloys used in power batteries mainly include 1-series, 3-series, 5-series, and 6-series.

Aluminum alloy has emerged as a leading material for automotive battery housings in emerging markets due to its **balanced cost-performance ratio**, though competition from ...

The EV power battery pack shell adopts aluminum alloy material, which has the characteristics of easy processing and forming, high temperature corrosion resistance, good heat transfer and ...

Aluminum alloy has a density of approximately 2.7g/cm³, about one-third that of steel. Using an aluminum shell significantly reduces the ...

Constellium offers complete aluminum solutions--rolled and extruded--for modern battery systems, including foils, connectors, thermal and enclosure components. Designed to boost ...

Chalco's production of power battery aluminum trays mostly uses 6-series 6061 aluminum plate as the raw material for battery aluminum trays, which can meet the characteristics of high ...

Battery pack aluminum alloy
