---

The present application relates to the technical field of batteries, and discloses a battery temperature control method and apparatus, a storage medium, and a computer device, mainly...

The research will explore three main areas of development which include hybrid PCM composites and intelligent control systems and AI-based optimization methods. The ...

Therefore, an effectual battery thermal management system (BTMS) should be designed and applied to dissipate heat, and control the battery temperature during the desired ...

For battery packs it is important to regulate the pack to remain in the desired temperature range for optimum performance and life, and also to reduce uneven distribution of temperature ...

Keeping these batteries at temperatures between 285 K and 310 K is crucial for optimal performance. This requires efficient battery ...

The temperature and current management of battery storage systems are crucial for the performance, safety, and longevity of electric vehicles (EVs). This paper.
