How many solar energy storage systems have been evaluated by HTW Berlin?

22 home storage systems have been evaluated by the HTW Berlin, including new products from Fox ESS, Fronius, Kostal and SAX Power. March 6, 2025 22 solar energy storage systems from a total of 17 manufacturers have been evaluated by the HTW Berlin University of Applied Sciences in this year's Energy Storage Inspection.

What is a residential energy storage system?

A residential energy storage system is a power system technology that enables households to store surplus energy produced from green energy sources like solar panels. This system beautifully bridges the gap between fluctuating energy demand and unreliable power supply, allowing the free flow of energy during the night or on cloudy days.

Can a residential energy storage system change the way households consume and store energy?

We'll also take a closer look at their impressive storage capacity and how they have the potential to change the way households consume and store energy. A residential energy storage system is a power system technology that enables households to store surplus energy produced from green energy sources like solar panels.

Where can I contact the Solar Storage Systems Research Group?

Interested manufacturers can contact the Solar Storage Systems Research Group at HTW Berlin directly. Since 2018, a total of 33 manufacturers have taken part in the Energy Storage Inspection, of which 24 companies decided to be mentioned by name in the study.
