Belgium's grid operator Elia has warned that the country could face blackouts due to an excess supply of solar energy.

The share of solar in the electricity mix was up from 9.5% in 2023. It was the largest source of renewable electricity generation last year, overtaking offshore wind.

Wind and solar power were the largest electricity generators in Belgium from January to June this year, a report from energy think tank Ember showed. This phenomenon ...

Distribution of wind potential Annual generation per unit of installed PV capacity (MWh/kWp) Wind power density at 100m height (W/m<sup>2</sup>)

According to the power supplier Eneco Energie, more than two gigawatt of electric power, corresponding to two full-sized nuclear power plants, were generated by solar PV and ...

The share of solar in the electricity mix was up from 9.5% in 2023. It was the largest source of renewable electricity generation last ...
