And while most project opponents agree that NYC needs a green energy solution, they're also petitioning for the answer to be built farther away from their backyard.

The Garden Island Microgrid is an integrated renewable microgrid project including a connection to Carnegie's wave energy site directly offshore from the island.

STATEN ISLAND, N.Y. -- Applications for 58 battery energy storage systems were approved by the NYC Department of Buildings in 2025 and another 98 are currently under ...

Once completed, the project will be the largest battery storage installation in New York City. The facility will be able to power more than 10,000 households during peak demand ...

Located on Garden Island, Western Australia, the microgrid integrates solar photovoltaic (PV) power and battery energy storage, with provisions for future wave energy integration, to supply ...

Elevate Renewables has completed contracting to construct a battery storage facility to store power during non-peak hours and discharge power during peak demand ...
