---

As Europe races toward climate neutrality, Bulgaria's surge in storage capacity signals a shift not only in national priorities but also in regional energy dynamics.

In 2024, GSL ENERGY completed a 7.45 MW battery energy storage system (BESS) in Bulgaria, which is used in conjunction with a large-scale solar photovoltaic power ...

The generation structure in 2022 was dominated by coal-fired thermal power plants, followed by the Kozloduy nuclear power plant and hydroelectric plants, with the percentage ...

Transformation of AES Galabovo into a large-scale energy storage facility using proven technology implemented in concentrated solar power plants (CSP) using molten salts

Located next to a photovoltaic park within Balkan Industrial Park, it is part of the country's first closed licensed power distribution ...

A c.500MWh BESS project in Bulgaria has been inaugurated, claimed as the largest in the European Union (EU).
