---

The present work seeks to add to the literature based on CdTe by investigating the properties of As-doped CdTe solar cells under concentrated illumination (<7 Suns) and ...

Here, we focus on back contacts in the superstrate configuration with the goal of finding new materials that can provide improved passivation, electron reflection, and hole ...

Hence, this comprehensive review paper exclusively concentrates on the obstacles associated with the implementation of CdTe solar cells on UTG substrates with a potential ...

CdTe solar cells are defined as thin-film photovoltaic devices that utilize cadmium telluride as a semiconductor to convert sunlight into electricity, typically featuring copper-doped carbon ...

Disclosed are a high-efficiency cadmium telluride thin-film solar cell and a preparation method therefor.

PV array made of cadmium telluride (CdTe) solar panels. Cadmium telluride (CdTe) photovoltaics is a photovoltaic (PV) technology based on the use ...
