What is a curtain wall system?

Curtain wall systems are non-structural systems for the external walls of buildings. Kawneer engineers a comprehensive range of curtain wall systems available in traditional stick fabrication and unitized options. Stick-build curtain wall systems are assembled and glazed in the field with inside or outside glazing options.

What is the future of curtain wall systems?

The future is fibreglass. Enhanced beauty and reduced environmental impact with the industry's leading triple-glazed curtain wall systems. Thermal performance that's second to none. Our innovative triple-glazed fibreglass-framed curtain wall systems have been meticulously designed for low to medium-rise commercial and institutional applications.

What is a photovoltaic curtain wall?

They enhance thermal comfort and help prevent the greenhouse effect. A standard curtain wall offers no return on investment. In contrast, a photovoltaic curtain wall not only insulates the building but also generates power for over 30 years. This reduces monthly electricity bills and ultimately pays for itself over time.

What is a unitized curtain wall system?

Unitized curtain wall systems, assembled and glazed in the shop environment, offer the advantage of faster installation, improved product quality and lower installation costs. Discover our range of curtain wall cover options. Curtain wall systems are non-structural systems for the external walls of buildings.
