This report covers the following energy storage technologies: lithium-ion batteries, lead-acid batteries, pumped-storage hydropower, compressed-air energy storage, redox flow ...

Learning from Spain's island territories, Cape Verde adopted modular battery designs that allow gradual capacity expansion. This "pay-as-you-grow" model avoids the pitfalls of oversizing ...

As Cape Verde accelerates its renewable energy transition, a critical question emerges: What happens to expired energy storage batteries powering its solar and wind projects?

This article explores how the archipelago is overcoming energy challenges through innovative storage solutions, with insights on technology, economic impact, and lessons for island nations ...

The US Department of Energy (DOE) has provided dates and a partial breakdown of grants totalling US\$2.9 billion to boost the production of batteries for the electric vehicle (EV) and ...

Announced earlier this week (8 December), AFC and Cabeolica have officially opened the Cabeolica Wind Farm and Battery Energy Storage System (BESS) project, which ...
