In AEO2025, we project CO<sub>2</sub> capture at electric power and industrial facilities will increase through the 2030s, primarily due to increased tax credit values. Captured emissions ...

Senate Republicans" draft bill extends battery storage credits while phasing out other clean energy incentives. Learn how this affects the industry.

This EFIF report presents an analysis of the deployment of carbon capture and storage (CCS) technology in the power and industrial sectors.

The CCATS module allocates projected supply of captured CO<sub>2</sub> across the energy system for either enhanced oil recovery or geologic storage using a network representation of ...

Energy Storage Is Powering New York's Clean Energy Transition  
Energy Storage Safety  
An Expanded Goal of 6 Gigawatts by 2030  
In 2019, New York passed the nation-leading Climate Leadership and Community Protection Act (Climate Act), which codified some of the most aggressive energy and climate goals in the country, including 1,500 MW of energy storage by 2025 and 3,000 MW by 2030. In June 2024, New York's Public Service Commission expanded the goal to 6,000 MW by 2030. See more on [nysersda.ny.gov](https://nysersda.ny.gov)  
IRS Residential Clean Energy Credit - Internal Revenue Service  
If you invest in renewable energy for your home such as solar, wind, geothermal, fuel cells or battery storage technology, you may qualify for an annual residential clean energy tax credit. ...

Emerging technologies aimed at enhancing the efficiency of energy storage systems can result in greater emissions reductions and, ...
