Do base stations need to pass conformance tests?

Base stations need to pass conformance tests in the region where they will be installed before they can start operation in the field. For base stations the 3GPP specification TS 38.141 covers transmitter and receiver characteristics of base stations as well as receiver performance under noise and fading conditions.

What are 3GPP base stations conformance standards?

Based on the 3GPP base station conformance specifications, regional standardization bodies, local regulators and network operators implement test standards according to their needs. Base stations need to pass conformance tests in the region where they will be installed before they can start operation in the field.

Can a base station perform 3GPP radiated conformance testing over-the-air?

With the evolution of base stations, it is not only necessary to be able to perform 3GPP conducted conformance testing in a conducted manner, as well as radiated conformance testing over-the-air. Rohde & Schwarz offers a broad solutions portfolio for base station conformance testing.

What solutions does Rohde & Schwarz offer for base station conformance testing?

Rohde & Schwarz offers a broad solutions portfolio for base station conformance testing. The solutions range from high-performance signal generators and signal analyzers to turnkey test systems including shielded chamber environments.

Base station (BS) performance is vital for delivering expected quality of experience to end users. To ensure this, it is important that the base ...

Base station (BS) performance is vital for delivering expected quality of experience to end users. To ensure this, it is important that the base station conformance criteria is met and that they ...

Search Scope: Matches licenses with the following radio service codes: ZA. search criteria may result in a longer wait. +: Matches licensee mailing address, not transmit locations. search ...
