Communication is sharing messages through words, signs, and more to create and exchange meaning. Feedback is a key part of communication, and can be given through ...

This paper focuses on the automatic data configuration model of 5G co-construction and shared base stations that can identify and match different 5G network modes such as SA and NSA ...

Communication is simply the act of transferring information from one place, person or group to another. Every communication involves (at least) one sender, a message and a recipient.

This paper develops a method to consider the multi-objective cooperative optimization operation of 5G communication base stations and Active Distribution Network (ADN) and constructs a ...

The implementation of co-construction and sharing of 5G base stations in power infrastructure has brought new opportunities for the operation and development of

Communication is commonly defined as the transmission of information. Its precise definition is disputed and there are disagreements about whether unintentional or failed transmissions are ...
