What will the Czech electricity storage scheme do in 2025?

In an announcement released on March 7, 2025, the executive arm of the European Union said that the Czech scheme will support the installation of at least 1.5 GWh of new electricity storage facilities. The measure will be open to all storage technologies directly connected to the transmission network or distribution network.

Are there any large-scale electricity storage projects in the Czech Republic?

There are no other larger-scale electricity storage projects currently being developed in the Czech Republic. However, the Czech government provides subsidies to household projects consisting of photovoltaic panels with electricity storage systems.

Is there a future for energy storage in the Czech Republic?

Despite the ongoing discussions, there is no significant development in the area of energy storage. In 2015, the Czech Government adopted the National Action Plan for Smart Grids ("NAPSG") prepared by the Ministry of Industry and Trade under principles set out in the update of the State Energy Concept, which was also introduced in 2015.

Is the Czech Republic ready for pumped-storage hydroelectric power plants?

Bulk energy storage is currently dominated by hydroelectric dams, both conventional as well as pumped. There are six localities considered for new pumped-storage hydroelectric power plants in the Czech Republic but public acceptance presents a challenge. Front-of-meter installations in the Czech Republic are mired in regulations.

It will be open to all energy storage technologies that are directly connected to the transmission or distribution network, and will ...

CNTE's C&I energy storage initiative has been successfully deployed in Brno, Czech Republic, facilitating a green transformation for the local industrial park.

The European Commission (EC) has authorized a EUR279 million (\$303 million) Czech state aid scheme to support investment into electricity storage facilities and foster the ...
