---

Numerous energy storage technologies exist, each providing distinct advantages and disadvantages. The most prevalent forms include batteries, pumped hydro storage, and ...

"in the daytime" or "during the daytime" would be a much more natural and usual construction. I suspect this was devised by analogy with "at night" which is of course very normal.

By incorporating storage solutions, such as accumulators, you can capture and retain the surplus power your panels produce on sunny days, which raises the question of how ...

With solar battery storage, you can store excess energy generated during the day for nighttime energy needs. This means you can power your home with solar energy at night, ...

Tell me please what is the difference between the two expressions. Here is the context: Additionally, eating eggs has been linked to improved cholesterol levels and weight loss. In ...

"In the day" and "during the day" are the same as "in/during the daytime". They all say that something happens regularly during the time between dawn and sunset:
