What is the IEA demonstration projects database?

The most comprehensive database of clean energy technology demonstratorsThe IEA Demonstration Projects Database seeks to map major demonstration projects of clean energy technologies, globally. For each project, it provides information on location, sector and technology grouping, status, capacity, timing and funding, when available.

What are liftoff enabling programs & advanced nuclear projects?

The Liftoff Enabling Programs support the replication, market liftoff, and deployment of OCED's clean energy technologies. The Advanced Nuclear projects will speed up the demonstration of advanced reactors through cost-shared partnerships with U.S. industry.

Are demonstration projects a loss-making investment?

Demonstration projects are usually loss-making investments when considered in isolation, with their combination of capital requirement and risk placing them squarely within what is often referred to as the "valley of death", a stage when technologies can fail to progress commercially even if they have high market potential.

Deliver clean energy demonstration projects at scale in partnership with the private sector to accelerate deployment and market adoption.

This case study provides an overview of the stakeholder engagement processes for a DOE-funded energy carbon storage ...

The world's first digital energy storage station with a capacity of 100 megawatt-hours has successfully completed its demonstration acceptance testing.

Explore the world of renewable energy demonstration projects, their significance, and the benefits they bring to the table.

This report provides an update on clean energy demonstrations worldwide based on project-level information featured in ...

Our team provides guidance throughout the entire energy storage project lifecycle, offering support at each

phase--from the development of ...
