What's happening with energy storage in Africa?

A roundup of energy storage news from across the continent of Africa, with Morocco's ONEE shortlisting bidders for a pumped hydro project, Somalia launching a grid-scale solar and storage tender, and a microgrid pairing grid-scale solar, BESS and diesel at a mine in Zambia. Morocco: utility ONEE progresses 300-400MW pumped hydro

Are energy storage boom times extending to Africa?

Boom times for energy storage have extended to the continent of Africa, with a 10-fold increase in installed storage supporting grids and renewable energy penetration.

How many storage projects are under development in Africa?

In total, AFSIA says around 18GWh of storage projects are under development across Africa. Tristan is an Electrical Engineer with experience in consulting and public sector works in plant procurement. He has previously been Managing Editor and Founding Editor of tech and other publications in Australia.

An increasing number of African countries are starting Requests for Proposals (RfPs) for projects including both solar and storage, as there is a growing understanding of the ...

Located in Kenya's Rift Valley, this large-scale solar farm harnesses the abundant sunlight of East Africa to generate clean, renewable electricity. The project utilizes advanced photovoltaic ...

Pumped hydro dams are prominentl­y used as energy storage in East Africa, but that is changing with the increase in renewable energy and battery energy storage systems.

In 2022, the continent had around 50MWh of energy storage capacity installed. Since then, energy storage capacity tripled in 2023 and then experienced another 10-fold ...

With new multi-billion-euro commitments to Africa's clean-energy expansion, the Invest in African Energy 2026 Forum will explore how the continent's transmission and storage ...

Located in Kenya's Rift Valley, this large-scale solar farm harnesses the abundant sunlight of East Africa to generate clean, renewable electricity. ...
