Vietnam is actively developing its pumped storage hydropower capacity, with the 1,200MW Bac Ai Pumped Storage Plant currently under construction. Several other pumped storage projects ...

The following page lists all pumped-storage hydroelectric power stations that are larger than 1,000 MW in installed generating capacity, which are currently operational or under construction.

Tim Weber and Andrew Blakers have published an article in the East Asia Forum explaining the almost limitless potential for solar photovoltaics in Southeast Asia, which can ...

PSH functions as a utility-scale method of energy storage, like a battery, by moving water between two reservoirs at different elevations. Water is pumped into the higher reservoir using ...

BANGKOK -- Pumped-storage hydropower plants, which generate electricity with pumped water and can help balance the supply of renewable energy, are expanding across ...

Explore how East Asian markets are valuing and incentivizing pumped storage hydropower, and examine the reforms and innovations needed to ensure its long-term ...
