What's new at ESS?

With increasing cell capacity, ESS keeps transitioning to higher-capacity cells, 5 MWh+ containers, and 400 kWh+ all-in-one systems. These can also be seen this year. Additionally, some products targeting specific European applications were introduced.

What happened to ESS bid prices in March 2024?

In March 2024, ESS bid prices varied depending on their storage capacity, with an overall downward trajectory evident, particularly in the case of four-hour ESS bids, which hit yet another all-time low. Raw material prices for storage battery are expected to remain stable. At the outset of 2024, battery prices experienced a decline.

What is the price gap between ESS and batteries?

In March, the price disparity between ESS and batteries has continued to shrink. The average price of a 280Ah/0.5C storage battery hovered around 0.38 yuan/Wh in March 2024. According to our data, the average winning price for a 2-hour ESS is approximately 0.63 yuan/Wh, resulting in a price gap of around 0.25 yuan/Wh.

Since 2023, the battleground of pricing has grown fiercer, with the cost of lithium carbonate plummeting, signaling an escalation in the ...

A survey conducted during the event shows that prices on the DC side range from USD 85-100/kWh (prices are mostly quoted by Chinese makers in FOB terms), while prices on ...

Since 2023, the battleground of pricing has grown fiercer, with the cost of lithium carbonate plummeting, signaling an escalation in the price wars of ESS tender projects. ...

Annual cost reductions for utility-scale energy storage projects in the Asia-Pacific (APAC) region are expected to slow sharply as global lithium supply tightens, consultancy ...

With tariffs on Chinese imports the culprit, solar and energy storage pricing platform Anza Renewables expects cost volatility to continue until there is certainty over US tariff policy.

Lithium carbonate prices have continued to fluctuate at elevated levels; recent price quotes for energy storage
