Our new generation of Mobile Energy Storage & Fast Charging Stations is engineered for demanding European environments--delivering 106 kWh capacity, 80 kW ultra-fast charging, ...

As spring arrives, Europe's EV charging infrastructure continues to grow, with significant developments across Northern, Central, and Southern Europe. The continent is making strides ...

ENE's iTrailerPortable and iContainer mobile energy storage systems provide innovative battery solutions, seamlessly integrating into Europe's accelerating decarbonization ...

The regulation promotes the use of energy storage in the EU's energy system, including the requirement for Member States to ensure that energy storage facilities have access to the grid ...

"By combining our ultra-fast charging technology with Pramac's energy storage solutions, we are supporting the increase of locations across Europe offering rapid and reliable ...

In this blog post, we'll explore the development of fast charging across Europe. By "fast," we're referring to DC charging stations with power outputs ranging from 50 to 350 kW.
