Who can use containerized fire training structures?

Our containerized fire training structures can serve a wide range of industries requiring fire and safety training including airline,military,oil and gas,petrochemical,fire departments,and training academies.

What types of fire training technologies can a container structure accommodate?

Our container structures can be designed to accommodate any and all of our proprietary fire training technologies (digital,gas fueled and carbonaceous). Enhance your training by including tactical elements such as forcible doors,cold cut panels and backdraft indicators in your design.

Do you use shipping containers for fire training?

Our pre-engineered and prefabricated structures use ISO freight containers (a.k.a. shipping containers) as the main building blocks. Using containers for fire training purposes has gained wide acceptance in the fire service industry as reflected in NFPA 1402 "Standard on Facilities for Fire Training and Associated Props."

Are stationary fire training structures NFPA compliant?

View some of our most popular stationary fire training structures. Our team of engineers can design unique configurations to meet your specific training needs and budgetary allowance. Rest assured your stationary structures will be National Fire Protection Association (NFPA) Compliant.
