What is an uninterruptible power supply (UPS) system?

Uninterruptible Power Supply (UPS) systems ensure reliable power for critical environments such as data centers, hospitals, telecom infrastructure, and industrial operations. These systems protect against data loss, equipment damage, and costly downtime during outages or power disturbances.

What is a military uninterruptible power supply?

SynQor's family of Shelter-Grade rack-mounted Military Uninterruptible Power Supply units are designed for the environmental and electrical conditions of Military applications. SynQor's military UPS incorporates proven high efficiency designs and packaging technologies.

What is the output power of the gcs180 series?

All models in the range have a no-load input power of less than 0.5 W and a typical efficiency of 93%. The GCS180 series is available in multiple mechanical formats, giving the designer several mounting configurations to choose from to suit the end application.

What is the difference between XP Power and gcs180?

XP Power expands their GCS series of single output, high-efficiency, "green" AC-DC power supplies with both ITE and Medical safety approvals. Complementing the GCS150 150 W models, the GCS180 range extends the power output capability up to 180 W.

Complete power protection and battery backup for business network equipment, servers, storage, and other critical equipment.

Ensure your communications and computing in a control tower, whether in the air or a thousand miles away. Find fail-safe assurance with an ...

SynQor's family of Shelter-Grade rack-mounted Military Uninterruptible Power Supply units are designed for the environmental and electrical conditions of Military applications.

Without operator intervention, they automatically select the appropriate input power ranges to accommodate global operation. The GUPS Series has been specifically designed to withstand ...

An uninterruptible power supply (UPS) helps prevent sudden shutdowns, data loss, and hardware damage by providing backup power when your main electricity fails.
