Two towns in Guinea, a country in West Africa which grapples with issues of energy security, are reaping the benefits of newly installed solar PV (photovoltaic) mini-grids backed with battery ...

Upon completion of production, the batteries will be swiftly packed and shipped to Guinea, where they are expected to make a significant impact on the local energy landscape.

In the past lead-acid batteries were the most common battery type used in off-grid and hybrid energy storage systems. Battery storage allows you to store your hybrid power wind and solar ...

In a compelling demonstration of solar innovation and energy independence, MOTOMA has successfully completed the installation of its Smart Energy Storage System ...

Lead batteries are very well established both for automotive and industrial applications and have been successfully applied for utility energy storage but there are a range of competing ...

This mobile storage solution powers nomadic communities using modular battery packs - think of it as energy on hooves. A recent pilot in Kankan Province stored enough juice ...
