In the CemSol research project, a team of scientists is developing and demonstrating a solar-heated calcination plant to produce cement. This process produces ...

CEMEX and Synhelion announced today the successful production of the world's first solar clinker, the key component of cement, ...

The table below outlines a simplified comparison of the core energy inputs for traditional and solar-integrated cement production, highlighting the shift in cost structures and ...

Switzerland-based Synhelion and Mexican construction materials supplier Cemex have started building a high-concentration solar ...

Unfortunately, the high temperatures required for manufacturing and the large-scale production make transitioning to ...

This study seeks to make a significant impact by developing an advanced concrete tailored for high-temperature applications, including critical uses in thermal energy storage for ...
