In this post, we'll help you understand your battery's state of charge, explain how it connects to energy rates and outage protection, and clear up a few ...

When a sensor on your system is triggered, it sends a signal to the Base Station, which sounds the loud, 100 dB siren and notifies you immediately. If the Base Station is unplugged or the ...

In this post, we'll help you understand your battery's state of charge, explain how it connects to energy rates and outage protection, and clear up a few common misconceptions.

Base batteries run in two directions, which is how Base is able to keep costs low for homeowners. The batteries charge during off-peak hours, like midday and late at night, when energy is more ...

Battery charge at the start of an outage: Backup time depends on how charged your battery is when the power goes out, which can fluctuate due to our grid-balancing operations.

As a battery's power throughput is only limited by the power demanded and supplied, it can take any amount of power and supply any amount of power. This means that it ...
