How much does a solar battery storage system cost?

Most solar battery storage systems cost \$10,000 on average, with most ranging between \$6,000 and \$12,000. Prices range from \$400 for small units to over \$20,000 for larger systems. Key cost factors include battery type, capacity, installation labor, and additional equipment.

How much does it cost to install a solar battery?

As of early 2025, the average cost to install a home solar battery in the U.S. ranges between \$9,000 and \$18,000 before incentives. After applying the 30% federal tax credit, most homeowners pay \$6,000 to \$12,000 for a complete setup. For a deeper dive into specific models and performance, explore our Best Solar Battery for Home guide.

How much does a solar battery cost in 2025?

In 2025, a typical solar battery installation costs \$9,000-\$18,000 before incentives and \$6,000-\$12,000 after credits. By 2026, continued cost declines are expected to make home energy storage even more accessible, with prices averaging 8-12% lower than current levels.

How much will solar battery cost in 2026?

Experts expect solar battery prices to continue declining through 2026. Based on data from BloombergNEF and Wood Mackenzie, lithium battery pack costs are projected to drop 8-12% year over year, reaching approximately \$550-\$850 per usable kWh installed by late 2026. Factors influencing 2026 pricing trends include:

Wondering what a solar container system costs? Explore real-world price ranges, components, and examples to understand what impacts total cost--and if it's worth the ...
