What is a Super freezer container?

Super Freezer Containers, often referred to as ultra-low temperature (ULT) containers, are highly specialized shipping containers designed to achieve and preserve products at an extremely low temperature. They typically range from -40°C to as low as -80°C or even colder. Some of the products that can be transported inside these containers are:

Is a refrigerated cold storage container right for your business?

If your business deals with temperature-sensitive cargo or requires cold storage, then this is the right product for you. We definitely have the most cost-effective refrigerated cold storage container for sale that will keep your items cold and in pristine condition. How cold can a refrigerated container get?

What size refrigerated shipping containers are available?

The two standard sizes of containers are 40 ft and 20 ft, and we can help you figure out which length suits your needs better. Also, depending on your budget, we have a selection of new, refurbished, and used cold-storage refrigerated shipping containers for sale, all of which have their own benefits.

How do refrigerated shipping containers work?

They work by using a refrigeration unit to control the temperature inside. The unit circulates cold air, removes heat, and keeps the desired temperature for cargo storage. How much does a refrigerated container cost?

Discover our diverse range of insulated containers, perfect for maintaining the temperature of your goods without the need for active refrigeration.

These polypropylene totes are chemically resistant to acids, alkalis, oils, and detergents. The tough, smooth surface won't chip and is mildew-proof.
