If the question here is if docker-compose build command, will build a zip kind of thing containing multiple images, which otherwise would have been built separately with usual ...

Both images would use build-args of the same name but different value. Also, as there are dozens of build args, it would be convenient to store them in a compose service specific build ...

Build solution will perform an incremental build: if it doesn't think it needs to rebuild a project, it won't. It may also use partially-built bits of the project if they haven't changed (I don't know ...

Almost unconsciously I hit the keyboard build macro that builds my entire solution. This can happen just as I notice a code change. The build dominates my computer, and I ...

To run a build task automatically before debugging, you will need to link a build task to your debug config. I'll try to illustrate the process below. First to access your build ...

I am trying to install Pygame using this: `pip install pygame` and I get this result: `" pip install pygame  
Collecting pygame Using cached pygame-2.4.0.tar.gz (13.2 MB) Installing ...`
