There are several reasons for high energy consumption. Among them, we find that the increase in base station density of the 5G heterogeneous network (5G HetNets) is ...

One of the most concerning issues in 5G cellular networks is managing the power consumption in the base station (BS). To manage the power consumption in BS, we proposed a hybrid AC/DC ...

In order to compare the absorption and efficient utilization of renewable energy in microgrid system by 5G base station, and consider whether to access 5G base station or not, ...

We present a micro base station deployment strategy in 5G HetNets for obtaining high energy efficiency.

Grounded in the spatiotemporal traits of chemical energy storage and thermal energy storage, a virtual battery model for base stations is established and the scheduling ...

In this paper, a multi-objective capacity optimization allocation strategy for hybrid energy storage microgrids applicable to 5G base stations in remote areas i
