What is a solar fan?

A solar fan, or Direct Current (DC) fan, is a fan that can be plugged directly into a solar panel or a battery to provide ventilation anywhere. Snap-Fan's Brushless DC (BLDC) motors are unique in that they can be powered directly from a solar panel without any need for batteries or other expensive equipment.

How do solar-powered fans work?

As we mentioned previously, solar-powered fans use solar panels to generate electricity. This electricity makes the motor of the fan function. The fan moves at the highest speed when the sun is at its hottest during the day. The solar panels in solar-powered fans are made of photovoltaic cells.

How can I customize my Solair fan package?

You can also customize your fan package by adding optional accessories such as a weather hood with bird screen, or choosing an extended life system configuration. The SolAir fan combines eco-friendly solar energy with rugged construction and offers facilities a powerful ventilation solution!

What is industrial fans direct?

Industrial Fans Direct offers expert advice, free shipping on most orders, a best price guarantee and excellent after-sale support for all of your air movement projects. Wall-mounted exhaust fans remove heat, odors, and airborne contaminants from commercial and industrial spaces.
