How much battery energy storage capacity is available in India?

Between 2022 and May 2025, India auctioned approximately 12.8GWh of battery energy storage system (BESS) capacity for both hybrid and standalone applications. However, only about 219MWh of BESS capacity is reported to be operational, leaving a large pipeline of projects under construction.

How is India supporting the growth of energy storage capacities?

The Government of India is supporting the growth of energy storage capacities with a combination of policies and incentives.

Does India need a better energy storage system?

At present, low-carbon-based electricity accounts for nearly 23% of India's total power generation, with a target of non-fossil fuel power capacity by 2030, the government is indicating a strong need for better storage solutions. BESS is integral in ensuring grid stability by managing the intermittency of the supply from renewable sources.

What is the share of hybrid energy tender capacity in India?

With a rise in preference for firm renewable energy, the share of hybrid tendered capacity has increased from about 12% in 2021 to over 49% in 2024 in the overall renewable energy tenders. Between 2022 and May 2025, India auctioned approximately 12.8GWh of battery energy storage system (BESS) capacity for both hybrid and standalone applications.

Between 2022 and May 2025, India auctioned approximately 12.8GWh of battery energy storage system (BESS) capacity for both ...

This is a good market for Indian BESS manufacturers as many emerging markets lack local manufacturing and are seeking competitively priced, regionally supported storage ...

Explore the top 10 Battery Energy Storage System (BESS) companies in India for 2026. Discover industry leaders like Exide, Waaree Energies, ...

Evaluate Indian lead battery suppliers based on technical compliance, production capacity, and delivery performance. Compare pricing, MOQs, and customization options for industrial and ...
