Orange DRC, part of the French-owned Orange group, claims to be the first operator in the Democratic Republic of Congo (DRC) to begin testing 5G.

Vodacom Congo revealed it has began testing 5G technology but its strategy remains rooted to deploying 4G base stations to expand coverage, reported IT Web Africa.

The operator has struggled with the deployment of mobile sites in the country, as the majority of its base stations are dependent on diesel generators for power.

Currently, the DRC still suffers from a profound connectivity gap. For public administration and education services to be adopted at scale, they must first be available on existing 3G/4G ...

Orange RDC brings 5G trials to the Democratic Republic of Congo, offering ultra-fast mobile internet and transforming communication experiences.

The Democratic Republic of Congo, renamed Fatshimetrie, has launched the first 5G network in Central Africa. This technological advancement offers opportunities for ...
