At Stanford University, engineering researcher Nina Vaidya designed an elegant device that can efficiently gather and concentrate light that falls on it, regardless of the angle ...

At Stanford University, engineering researcher Nina Vaidya designed an elegant device that can efficiently gather and concentrate ...

With a single-axis sun-tracking system, this configuration enables the mirrors to track the sun from east to west during the day, which ensures that the ...

Concentrator Photovoltaics (CPV) is an advanced solar technology that boosts solar energy harvesting by focusing sunlight onto ...

In a luminescent concentrator, light is refracted in a luminescent film, and then being channelled towards the photovoltaic material. This is a very ...

Concentrator Photovoltaics (CPV) is an advanced solar technology that boosts solar energy harvesting by focusing sunlight onto a small area of high-efficiency photovoltaic ...
