---

In order to achieve the ambitious goal of "climate neutrality by 2040" in Austria, an integrated energy system must be created in which energy storage systems take on central functions.

RAG's energy storage facilities are highly versatile. Their wide range of capabilities guarantees security of supply in Austria and Europe, and they hold the key to a green energy future.

A study 1 carried out by the University of Applied Sciences Technikum Wien, AEE INTEC, BEST and ENFOS presents the market development of energy storage technologies in Austria for ...

The country's Climate and Energy Fund has launched a new call for proposals for "Medium-sized electricity storage systems" of between 51kWh and 1MWh in energy storage ...

GSL ENERGY liquid-cooled energy storage systems not only help your factory save on electricity costs and ensure production stability but also assist you in addressing challenges ...

The demand for energy-efficient cooling solutions is driving the liquid cooling market in Austria. As data centers increasingly seek to optimize thermal management, liquid cooling offers superior ...
