Since 2014, we have pioneered renewable energy solutions to replace traditional resources from fossil fuels. Our Solar Home Systems (SHS), ...

The Salima Solar Power Project in Malawi is poised to be a game-changer for the country's energy landscape. Scheduled for commissioning by December 2025, this ambitious ...

Co-developed with the local community, they deliberately selected one of Malawi's most remote and low-income communities to maximise learnings. The infrastructure now enables solar ...

A UK-based charity has installed solar photovoltaic systems in all 9,000 households of a rural village in Malawi, Kasakula.

These 3 solar power developments in Malawi come at a time when the population is expanding and demand for energy is growing.

The Dwangwa Solar Power Station is a 55 MW (74,000 hp) solar power plant under development in Malawi. The power station, owned and under development by Voltalia, the French multinational independent power producer (IPP), has an attached 10MWh battery energy storage system (BESS), raising the power station's generation capacity to 65 MW. The electric power generated here will be sold to the national electricity parastatal utility company, Electricity Supply Corporation of Malawi
