What is lithium hexafluorophosphate in a LiFePO₄ battery pack?

The electrolyte in a LiFePO₄ battery pack serves as the medium for the transport of lithium ions between the anode and the cathode. It is typically composed of a lithium - containing salt dissolved in an organic solvent. Lithium hexafluorophosphate (LiPF₆) is a commonly used salt in the electrolyte.

What are lithium ion chemistries made of?

Cathode: Composed of Lithium Iron Phosphate(LiFePO₄),the cathode material offers exceptional stability and safety compared to other lithium-ion chemistries. Anode: Typically made of graphite,the anode enables the smooth movement of lithium ions during the charging and discharging cycles.

What is lithium hexafluorophosphate?

Lithium hexafluorophosphate (LiPF₆) is a commonly used salt in the electrolyte. When dissolved in the organic solvent,LiPF₆ dissociates into lithium ions (Li⁺) and hexafluorophosphate ions (PF₆⁻),providing a source of mobile lithium ions for the battery's operation.

LiFePO₄ battery packs provide superior safety with minimal risk of thermal runaway, long lifespan, excellent high-temperature performance, and fast charging capability. They are lightweight, ...

These battery packs are widely recognized for their unique combination of safety, performance, and longevity, making them suitable for an extensive range of applications, from ...

Our LiFePO₄ Battery Pack with Grab Handle range meet the same safety standards as the tracer LiFePO₄ Battery Packs and are ideal for ...

The Prismatic lithium iron phosphate battery cell is packaged in an aluminum case with a maximum energy density of 185Wh /kg. Prismatic cell is currently the most widely used type in ...

With models ranging from 12.8V 50Ah to 12.8V 300Ah, these lithium iron phosphate (LiFePO₄) batteries provide a reliable and efficient solution for various applications, outlasting ...

Our LiFePO₄ Battery Pack with Grab Handle range meet the same safety standards as the tracer LiFePO₄ Battery Packs and are ideal for powering motors and where a higher output current ...
