OverviewHistory of the bifacial solar cellCurrent bifacial solar cellsBifacial solar cell performance parametersA bifacial solar cell (BSC) is a photovoltaic solar cell that can produce electrical energy from both front and rear side. In contrast, monofacial solar cells produce electrical energy only when photons are incident on their front side. Bifacial solar cells and solar panels (devices that consist of multiple solar cells) can improve the electric energy output and modify the temporal power production profile co...

Bifacial solar panels are double-sided panels that use both the top and bottom sides to capture and transform the solar energy. They've been around since they were first used in ...
