What is a glass greenhouse?

Glass greenhouses provide options for improved insulation and solar heat gain through various types of glass, such as low-emissivity (low-E) or insulated glass units.

What is a greenhouse integrated PV (GIPV) module?

Get in touch! Traditional greenhouses rely on external fossil fuel derived energy sources to power lighting, heating and forced cooling. Specially designed BiPV solar glass modules for greenhouses, Heliene's Greenhouse Integrated PV (GiPV) modules offer a sustainable alternative with no additional racking or support required.

What is a greenhouse?

A growing environment designed specifically for you. A greenhouse is an aluminum-framed structure, glazed with glass or polycarbonate, that is used to propagate and/or grow plants. Solar Innovations® designs and manufactures custom greenhouses to each customer's exacting specifications, no matter the size or purpose.

Why should you choose solar innovations® for Your Greenhouse & Conservatory?

Unlike most greenhouse & conservatory manufacturers, Solar Innovations® provides all the necessary fasteners, silicone, and flashings for your project. These services help customers reduce installation time and cost, providing a high quality final product.
