Should battery storage facilities comply with NFPA 855?

Ensuring Safety at All Future Energy Storage Facilities: Requiring all battery storage facilities to comply with the latest published version of NFPA 855. State and local governments should proactively adopt and enforce this safety standard.

Where can I find a UL certified battery containment enclosure?

Battery containment enclosures certified by UL Solutions to UL 1487 can be found in the online certification directory, UL Product iQ. Product iQ is available to use at no cost but requires a one-time registration.

What are battery containment products?

In addition to these prevention strategies, battery containment products have emerged which are purpose-built for mitigation of thermal runaway hazards of lithium-ion batteries and battery-powered devices that are stored and charged inside of them. UL 1487, Battery Containment Enclosures, was created to evaluate these products.

UL Standards and Engagement introduces the first edition of UL 1487, published on February 10, 2025, as a binational standard for the United States and Canada.

Learn about battery storage cabinets--how they're designed, the standards they meet, and the best practices for lithium-ion battery ...

UL Standards and Engagement introduces the first edition of UL 1487, published on February 10, 2025, as a binational standard for the United ...

Battery energy storage cabinets typically utilize a variety of materials, with metallic and polymeric substances being the most common. Steel is often favored for its strength and ...

Battery Energy Storage Systems, or BESS, help stabilize electrical grids by providing steady power flow despite fluctuations from inconsistent generation of renewable ...

Achieving a safe and compliant battery cabinet installation comes down to a systematic approach. By following a detailed checklist covering clearance, ventilation, and ...
