---

We need to think more deeply about thermal energy storage as a pathway to industrial decarbonisation and managing electricity costs, writes Pasquale Romano, CEO of Redoxblox.

Explore 10 new energy storage companies from 2.8K+ entrants, advancing the industry with flywheel energy storage, underground batteries, micro-channel-based hydrogen storage & more.

Rapid cost declines in lithium-iron-phosphate (LFP) technology, the pivot to >6-hour battery energy storage systems (BESS), and the accelerating electrification of transport ...

The energy storage industry is planning to deliver and expand upon these investments and continue the battery manufacturing boom jump-started by rapid energy storage deployment.

As the global energy transition reaches a critical juncture, the energy storage industry is emerging as a new frontier that attracts significant capital investment.

On January 9, 2025, the "Energy Storage No. 1" global first 300-megawatt compressed air energy storage demonstration project, invested and constructed by China Energy Engineering Group ...
