Where is New Zealand's first large-scale battery storage system located?

Meridian Energy has officially opened New Zealand's first large-scale grid battery storage system at Ruakaka, the first of its kind, and a milestone in the country's renewable energy infrastructure development. The Ruakaka Battery Energy Storage System (BESS) delivers 100 megawatts (MW) of maximum output with 200 MW-hour storage capacity.

What is the NZ battery project?

The NZ Battery Project was set up in 2020 to explore possible renewable energy storage solutions for when our hydro lakes run low for long periods. A pumped hydro scheme at Lake Onslow was one of the options being explored. The Government stopped the Lake Onslow investigations in late 2023.

Who is launching New Zealand's largest battery energy storage system?

WEL Networks and Infratec are proud to announce the launch of New Zealand's largest Battery Energy Storage System (BESS) with commissioning underway.

What is a New Zealand battery?

Energy type: Battery storing electricity generated by New Zealand's hydro, geothermal and wind power stations when there is low demand. Construction: Begun July 2024 with the battery expected to be operational by March 2026.

While hydro still rules, New Zealand is starting to take battery storage seriously, especially on the North Island.

The battery is located at Huntly in the Waikato region on the upper North Island and is the first of its scale to commence operations in ...

This article explains the importance of grid-scale batteries as New Zealand shifts towards a highly renewable electricity system. What is grid battery storage and why is it ...

The battery site is due to be opened on Friday afternoon by Shane Jones, the Northland-based Regional Development Minister and Associate Minister for Energy. Marsden ...

The battery is located at Huntly in the Waikato region on the upper North Island and is the first of its scale to
