New Mexico entrepreneur Charles Call was working on a startup company to develop a solar-powered device for producing water from air. He realized that the company ...

From both the Flight Paths and Framework efforts, several key research areas were identified for flow battery technologies where additional research and investment would ...

PNNL researchers plan to scale-up this and other new battery technologies at a new facility called the Grid Storage Launchpad (GSL) opening at PNNL in 2024.

Researchers at the Department of Energy's Pacific Northwest National Laboratory (PNNL) have developed a new large-scale energy storage battery design featuring a ...

Flow batteries are emerging as a transformative technology for large-scale energy storage, offering scalability and long-duration storage ...

Key industry advancements such as the development of more efficient electrolytes, reduced costs, and enhanced system designs are shaping the future of liquid flow batteries in ...
