---

The Battery Energy Storage System (BESS) enables Ottawa to integrate six newly approved solar projects and reduce increasing reliance on gas-fired electricity during peak hours.

Essentially, a BESS is a massive collective battery -- in this case a lithium ion battery -- to store electricity and distribute it as needed. The proposed property totals about 81 ...

These systems can include renewable energy sources such as wind turbines in neighbourhoods, solar panels on homes and businesses, and battery technologies for storing excess power.

Power your home with clean, sustainable energy, and keep more money in your pocket. Our customized residential solar installations are designed for Ottawa homes to reduce hydro ...

The Ottawa BESS 2 Project will provide power to meet growing regional demand in the area, lease revenues for local landowners, additional property taxes for the City of Ottawa and ...

On May 9, 2024, the IESO announced that ten proposed BESS projects were selected, totaling 1,784 megawatts (MW) of energy storage, including two to be located in rural ...
